

Modular Free Standing Tables & benches

Kinetic Laboratories modular free-standing tables and benches are a flexible independent laboratory table, available in a standard size of 1500mm. The modular free-standing laboratory table is designed to be fully compatible with Kinetic modular suspended units. The scientific modular free-standing table comes complete with a Trespa ® Toplab ® BASE available in a variety of colours.

Constructed with a fully welded steel frame and swivel castors. The modular free-standing tables and benches can take a static load as standard of up to 125kg, with the option of using heavy-duty feet for a greater load bearing.

The steel frame is epoxy powder coated and available in a range of colours.

Each table is able to support up to 3 modular storage units. The modular storage units can be purchased at the same time or they can be easily installed into an existing Kinetic Laboratories modular mobile table at a later date.
